

SPA FILTRATION

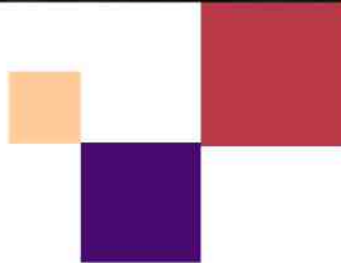

Purifiber[®]Spa

Purifiber[®] Spa is a completely safe to handle, high performance product specially designed to meet the needs of spa and hot tub filtration systems. Purifiber offers superior water clarity and longer filtering cycles, saving you time and money - an outstanding value for your spa.

Purifiber is a cellulose product that is used in conjunction with your spa's cartridge filter. The Purifiber evenly coats the cartridge, protecting the leaves from tears and thus extending the life of the cartridge. When it is time to clean the cartridge, the Purifiber is easily back-washed off the filter.

In addition, the level of filtration is enhanced when adding Purifiber to your cartridge filtration system. Purifiber has the ability to trap extremely fine particulates and remove them from the water, leaving your spa sparkling clean.

**Spend more time in the spa and
less time working on it!**

Purifiber Spa is enhanced with a safe, food-grade enzyme that actively breaks down oils in the water. Even with heavy bather loads, tanning oils and other contaminants, Purifiber keeps your water clean and fresh. You will immediately see the difference between water that has been simply filtered and water that has been polished the Purifiber way.

Purifiber Spa is also available with added aroma enhancers in Vanilla, Lilac, Ocean Breeze and Citrus varieties. These delightful scents will make your spa experience even more enjoyable and relaxing.

Dosage and Instructions

Dosage Rate: 8 oz. of product at a time, for any spa.

Instructions: To enhance cartridge filter performance and aid in cleaning, add up to 8 oz. of Purifiber® Spa to circulating water. Only add if cartridge is clean and free of oil and dirt. Clean cartridge if necessary by soaking in an appropriate cleaning solution. After spa water clarity is achieved, remove dirty cartridge and clean again to remove all dirt, debris and exhausted Purifiber. Use on a continuous basis to protect cartridge, assist in cleaning, and leave your spa water looking crystal clear and smelling fresh!
